Updated January 04, 2019. A

balanced chemical equation gives the number and type of atoms participating in a reaction, the reactants, products, and direction of the reaction. Balancing an unbalanced equation is mostly a matter of making certain mass and charge are balanced on the reactants and products side of the reaction arrow.

How to Balance Equations - Printable Worksheets

The student must find the equation that corresponds to what is inside each atom and then follow the arrow with the correct answer to the next atom. Once an atom is used it cannot be revisited, even if an arrow with the correct answer points back to it, the student must find another path and make their way to the end.
