Biology (Single Science) GCSE Biology is the study of living organisms and their structure, life-cycles, adaptations and environment.

GCSE Biology (Single Science) - BBC Bitesize

Biology is the study of life. It explores the complexity of living organisms, their structures and functions, and life processes such as photosynthesis, respiration, reproduction and digestion. Biology looks at how characteristics are passed from parents to their offspring and how natural selection operates, creating the great diversity of species in the world today.

Biology | CCEA
