# Access Free Good Laboratory Practice Oecd Principles And Guidance For Compliance Monitoring

The Principles of Good Laboratory Practice (GLP) are a managerial quality control system covering the organisational process and the conditions under which non-clinical health and environmental studies are planned, performed, monitored, recorded, reported and retained (or archived). The OECD Principles of GLP are followed by test facilities carrying out studies to be submitted to receiving authorities for the purposes of assessing the health and environmental safety of chemicals and chemical ...

# Access Free Good Laboratory Practice Oecd OECD PRINCIPLES OF GOOD LABORATORY PRACTICE

The Organisation for Economic Co-operation and Development (OECD) principles of good laboratory practice (GLP) are intended to assure data quality and integrity. The pre-clinical safety data generated in an OECD member country in accordance with the principles of GLP are indeed accepted in other member countries for purposes of assessment.

The principles of Good Laboratory Practice (GLP) promote the quality and validity of data generated in the testing of chemicals and prevent fraudulent practices. The principles have been developed in accordance with the Organisation for Economic Cooperation and Development (OECD) and the EU has adopted these principles and the revised OECD Guides for Compliance Monitoring Procedures for GLP as annexes to its two GLP Directives.

Working Group of OECD ...

The Principles of GLP. The Principles of GLP were first published in 1982 by the Organization for Economic Cooperation and Development (OECD). Since then, the European Commission has incorporated the principles into binding legislation, see Directive 2004/10/EC on the GLP website of the EC. Dutch legislation refers to this Directive.
