Zoning is a method of urban planning in which a municipality or other tier of government divides land into areas called zones, within which certain land uses are permitted or prohibited. Zones may be defined for a single use (e.g. residential, industrial), or may combine several compatible uses. Planning rules may be defined differently for each zone, determining whether planning permission ...

Zoning - Wikipedia

Zoning is a method of urban planning in which a municipality or other tier of government divides land into areas called zones, each of which has a set of regulations for new development that differs from other zones. Zones may be defined for a single use, they may combine several compatible activities by use, or in the case of form-based zoning, the differing regulations may govern the density, size and shape of allowed buildings whatever their use. The planning rules for each zone, determine wh

Zoning - Wikipedia

Land-use planning is the process of regulating the use of land in an effort to promote more desirable social and environmental outcomes as well as a more efficient use of resources. Goals of land use planning may include environmental conservation, restraint of urban sprawl, minimization of transport costs, prevention of land use conflicts, and a reduction in exposure to pollutants.
