With the PerkinElmer exclusive power-compensation technique, you get the whole story about your sample. PerkinElmer pioneered this proven approach to DSC nearly 40 years ago. Two small, low mass furnaces heat and cool rapidly, providing better resolution and higher sensitivity enabling detection of transitions that are missed in conventional heat-flux systems. And, since the design measures ...

The Diamond DSC is PerkinElmer's unique power-compensation DSC, offering unparalleled sensitivity and insights into materials processes. In this exclusive design, the sample and reference pans are heated by two independent furnaces embedded in a temperature-controlled heat sink. This allows sophisticated analysis when performing the direct measurement of heat flow into or out of a sample The ...
