Creativity as a career is not 100 percent creative. Creative education helps teach how to take that creativity and turn it into a career. Creatives are good at creating — but often aren't so great at marketing, accounting or writing a business plan. Creative education can fill in those gaps. Creative education teaches you to spot a good idea.

Start with the end in mind - Creative Education

ABSTRACT. In this commentary, I build on recent interdisciplinary models for embodied cognition with additional perspectives from affective neuroscience, educational psychology, creativity theory, and science education. I invoke William James and John Dewey, pioneers of an embodied philosophy of mind, alongside recent affective neuroscience theory about the role of bodily emotional response in learning.
